

### PRODUCT DESCRIPTION

Roterra water tanks are used for the purpose of collecting rainwater for domestic use.

They are made of one piece of polyethylene and offer 100% waterproofing.

The reservoir has a telescopic raise  $\Phi$  600 x 400 mm, which allows adjustment of the height of the tank. On the top of the water tank, a polyethylene cover, suitable for loads up to 200 kg, is installed.

A different diameter of inlet and outlet pipes can be arranged on the reservoir.

The shape and dimensions of the Roterra tanks, make it easy to manipulate on the construction site.

**The tank has been tested in accordance with standard SIST EN 12566 – 3.**
